EXPERIENCE

Software Engineer, Contractor
Beb

📅 May 2022 – Ongoing   📍 Remote

- Incoming Software Engineer @ Beb.xyz a California web3 startup backed and funded by Polygon

Teaching Assistant
Carleton University

📅 Jan 2022 - April 2022   📍 Ottawa, CA

As a Computer Science Teaching Assistant for COMP 2401 (Introduction to Systems Programming), I was conducting weekly office hours with a strong knowledge of C to assist under 200 students with assignments, debugging and developing test cases and deepening their understanding of course material

- Communicating with students during tutorial sessions to answer student questions and to ensure all questions were answered properly
- Collaborating with the course staff to assess the classes progress through marking assignments, tests and exams and providing feedback to all 200 students
- Doing pair programming exercises via tutorials office hours to increase students understanding of complex topics such as threading, pointers, semaphores etc

Software Coordinator
FMM Tec Team

📅 Sept 2019 – Mar 2020   📍 Markham, CA

- Instructed lessons on Java and concepts such as OOP, modular programming, etc
- Prepared student members for the Waterloo Canadian Computing Competition (CCC)

PROJECTS

Pokemon Query Program
Client-Server

📅 2022   📍 Ottawa, CA

- Pokemon Query Program that would take in a CSV file with hundreds of Pokemon and their descriptions and would sort the pokemon based on the user inputted Pokemon type. For instance user would input "Fire" a seperate csv file named "Fire.csv" would be created and all Pokemon of that type and their descriptions would be placed in "Fire.csv" all while communicating between Client-Server code and making use of Linked-Lists, Multi-Threading and Sockets to deliver a fast response to user. Created using the C programming language.

Cryptocurrency Converter
Java

📅 2021   📍 Markham, CA

- Developed a cryptocurrency converter that would take in fiat currency and convert to ethereum, bitcoin, litecoin etc.
- Developed using http requests to an API in native Java

EDUCATION

BCs Honours
Computer Science
**Carleton University**

📅 2020 – 2024   📍 Ottawa, Canada

🏆

STRENGTHS

Concurrent Programming
Software Architecture & Design
Design Patterns
Modular Programming
Object Oriented Programming
Functional Programming
Design by Contract
